

Alfa Laval Access Tank Cover - Circular Cover Type LKDS

When you need a High Quality Opening

Application

The circular LKDS stainless steel manhole cover is used on top of tanks or containers where a closeable mean of access to the interior of the tank is required, and is especially suitable for dairy balance tanks and CIP holding tanks.

Working principle

The LKDS cover is not designed to fit watertight to the tank and therefore it is supplied with a splash guard to prevent liquid spraying out during a cleaning process.
